Mutual funds are priced as of the previous business day's market close when the market is open. Mutual fund positions are priced as of the official market close (typically 4 p.m.) and prices are generally available between 5 p.m. and 6 p.m.

Securities are priced real-time. If the current market price is unavailable or the market is closed, Fidelity will factor in the most recent closing market price to determine the closing market value.

If current market price is unavailable, Fidelity will display the most recent closing market price and closing market value in the Price and Most Recent Value columns.

¹ Cost basis is currently not available for this position. We are actively processing updates to your cost basis based on trades placed earlier today.

² Cost basis is currently not available for this position. Updated cost basis will be available prior to market open tomorrow.

** This is the core account used for trade settlement.

c - Customer provided cost basis. In some cases Fidelity does not apply wash sale rules to tax lots with customer provided cost basis.

e - The Cost amount for this security was estimated based on the fair market value of this security when it was originally deposited in your account or based on the earliest date Fidelity has transaction history available for this account. You may change this amount if it does not coincide with your records.

t - Third party provided cost basis. In some cases Fidelity does not apply wash sale rules to tax lots with third party provided cost basis.

6 In the case of a short sale, total cost ordinarily equals the cost of the asset (including commissions, if any) when purchased for delivery when the sale is closed or covered. However, as cost basis is unknown until the date the short sale is closed or covered, the value Fidelity reports in the Cost Basis column is equal to the price at which the short sale was transacted (total sales proceeds). When calculating the unrealized gain/loss, Fidelity adds the negative value reported in the Closing Mkt Value Column to the positive value reported in the Cost Basis column.

m - This position has been marked to the market. The cost basis and acquisition date were adjusted to reflect the market value of the security on December 31 of the previous year. See the IRS Publication 550 for more information about the IRC Mark to Market requirement for Section 1256 Contracts. For all other securities, see the IRS Publication 475 for more information about the IRC Mark to Market Election.

W - Adjusted due to previous wash sale disallowed loss. If you sell shares at a loss and you purchase additional shares of the same or a substantially identical security (in the same or a different account) within the 61 day period that begins 30 days before and ends 30 days after the sale, the purchase may result in a wash sale. If a wash sale occurs, the loss from the transaction should be "disallowed" for tax purposes, and the amount of the loss should be added to the cost basis of the newly-purchased shares. Unless otherwise requested or noted, Fidelity adjusts cost basis information related to newly-purchased shares when a wash sale occurs within an account as the result of an identical security purchase. Fidelity does not report disallowed losses or adjust cost basis information related to wash sales triggered by sales and purchases of the same security within different accounts or by sales and purchases of substantially identical securities within the same or different accounts. Fidelity does not apply any wash sale rules to tax lots with customer or 3rd-party provided cost basis. You must check your own records across all of your Fidelity and non-Fidelity accounts to ensure that you are correctly accounting for losses related to any wash sales.

NFS will report certain cost basis and holding period information to you and to the IRS on your annual Form 1099-B as required or allowed by law, but such information may not reflect adjustments required for your tax reporting purposes. Taxpayers should verify such information when calculating reportable gain or loss. Fidelity and NFS specifically disclaim any liability arising out of a customer's use of, or any tax position taken in reliance upon, such information. Unless otherwise specified, NFS determines cost basis at the time of sale based on the average cost method for open-end mutual funds and based on the first-in, first-out (FIFO) method for all other securities. Consult your tax advisor for further information.

If securities held in your account are restricted for sale under your company's stock plan rules, Fidelity will use the FIFO method for lots available for sale.

For holdings purchased in a currency other than USD, the cost basis provided in USD was determined by converting the foreign currency cost into USD based on exchange rates on the trade date of purchase. For tax reporting purposes, you may be required to determine your actual USD cost basis for holdings purchased in foreign currency based on exchange rates on the settlement date of purchase. Consult a tax advisor for further information.

For certain foreign security holdings, Change Since Purchase in USD is broken down into market gain/loss and currency fluctuation components for informational purposes only. The market gain/loss and currency fluctuation components should not be used for tax reporting purposes. For details regarding how market gain/loss and currency fluctuation were calculated, please refer to Help/Glossary.
