UNITED STATES BANKRUPTCY COURT
FOR THE DISTRICT OF DELAWARE

In re:	:	Chapter 11
EXIDE TECHNOLOGIES, et al.	:	Case No. 02-11125 (JCA) (Jointly Administered)
Debtors.	:	Objections Due: December 10, 2002

FOURTH MONTHLY INTERIM APPLICATION OF MORRISON & FOERSTER LLP FOR COMPENSATION FOR SERVICES RENDERED AND REIMBURSEMENT OF EXPENSES AS SPECIAL COUNSEL TO THE DEBTORS FOR THE PERIOD FROM AUGUST 1, 2002 THROUGH AUGUST 31, 2002

Pursuant to sections 330 and 331 of Title 11 of the United States Code (the "Bankruptcy Code"), Rule 2016 of the Federal Rules of Bankruptcy Procedure (the "Bankruptcy Rules"), and this Court's Order Establishing Procedures for Interim Compensation and Reimbursement of Expenses of Professionals and Committee Members Pursuant to 11 U.S.C. §§ 105(a) and 331, entered May 10, 2002 (the "Administrative Order"), Morrison & Foerster LLP (the "Firm") hereby submits this "Fourth Monthly Interim Application of Morrison & Foerster LLP for Compensation for Services Rendered and Reimbursement of Expenses as Special Counsel to the Debtors for the Period from August 1, 2002 through August 31, 2002" (the "Application"). By this Application the Firm seeks allowance and payment of monthly interim compensation in the amount of $113,263.08, representing eighty percent of fees generated — $141,578.85, and reimbursement of actual and necessary expenses in the amount of $44,073.86 for a total of $157,336.94 for the period of August 1, 2002 through August 31, 2002 (the "Interim Period"). In support of the Application, the Firm respectfully represents as follows:

I. GENERAL BACKGROUND

1. On April 15, 2002 (the "Petition Date"), Exide Technologies and other affiliated companies (collectively the "Debtors") filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code with this Court.

2. The Debtors have been operating their businesses and managing their properties as debtors in possession pursuant to sections 1107(a) and 1108 of the Bankruptcy Code.

3. This Court has jurisdiction over this matter pursuant to 28 U.S.C. §§ 157 and 1334. This is a core proceeding pursuant to 28 U.S.C. § 157(b)(2).

4. On May 10, 2002, the Court entered the Administrative Order. Pursuant to the procedures set forth in that Administrative Order, retained professionals may request compensation and reimbursement by filing fee applications, and interested parties may object to such applications. If no interested party objects to a professional's request within twenty (20) days, the applicable professional may submit to the Court a certification of no objection after which the Debtors are authorized to pay such professional an amount equal to the lesser of (i) 80 percent of the fees and 100 percent of the expenses requested in the monthly fee application, or (ii) 80 percent of the fees and 100 percent of the expenses not subject to an objection. Beginning with the period ending on June 30, 2002 and at three-month intervals thereafter, or such other intervals as are convenient to the Court, each professional shall file and serve a quarterly application for allowance of fees and reimbursement of expenses sought in the monthly fee applications for that period. Amounts paid pursuant to the monthly and quarterly fee applications are subject to the filing and approval of a final fee application of the professional.

5. The Debtors' retention of the Firm as special counsel to the Debtors was approved *nunc pro tunc* to the Petition Date by this Court's Order, dated June 14, 2002 (the "Retention Order"). The Retention Order authorized the Firm to be compensated on an hourly basis in accordance with the "terms of past representation," which includes billing in quarter-hour

increments and flat rates for certain, discrete projects, and reimbursement for actual and necessary out-of-pocket expenses upon the filing of a fee application.

6. The Firm submitted its "First Monthly Interim Application of Morrison & Foerster LLP for Compensation for Services Rendered and Reimbursement of Expenses as Special Counsel to the Debtors for the Period From April 15, 2002 Through May 31, 2002" on or about October 18, 2002, for which the Firm has not yet received the $185,853.80 requested therein as compensation for fees nor has the Firm received the $11,586.67 requested therein as reimbursement of actual and necessary expenses incurred.

7. The Firm submitted its "Second Monthly Interim Application of Morrison & Foerster LLP for Compensation for Services Rendered and Reimbursement of Expenses as Special Counsel to the Debtors for the Period From June 1, 2002 Through June 30, 2002" on or about November 1, 2002, for which the Firm has not yet received the $137,020.04 requested therein as compensation for fees nor has the Firm received the $32,734.93 requested therein as reimbursement of actual and necessary expenses incurred.

8. The Firm submitted its "Third Monthly Interim Application of Morrison & Foerster LLP for Compensation for Services Rendered and Reimbursement of Expenses as Special Counsel to the Debtors for the Period From July 1, 2002 Through July 31, 2002" on or about November 12, 2002, for which the Firm has not yet received the $148,998.72 requested therein as compensation for fees nor has the Firm received the $40,559.90 requested therein as reimbursement of actual and necessary expenses incurred.

9. The Firm submitted its "First Quarterly Interim Application of Morrison & Foerster LLP for Compensation for Services Rendered and Reimbursement of Expenses as Special Counsel to the Debtors for the Period From July 1, 2002 Through July 31, 2002" on or about November 12, 2002, for which the Firm has not yet received the $83,868.26 requested therein as

compensation for the remaining twenty percent (20%) of fees from the Petition date through June 30, 2002.

10. The Firm has received no other payment and no promises for payment from any source for the services rendered or to be rendered in any capacity whatsoever in connection with the matters covered by this Application. There is no agreement or understanding between the Firm and any other person other than the partners of the Firm for the sharing of compensation to be received for services rendered in these cases.

11. To the best of the Firm's knowledge, this Application complies with sections 330 and 331 of the Bankruptcy Code, the Bankruptcy Rules, the Local Rules of Bankruptcy Practice and Procedure of the United States Bankruptcy Court for the District of Delaware (the "Local Rules") and the Administrative Order.

II. FEES AND EXPENSES REQUESTED

A. Legal Fees Generated by the Firm.

12. The Firm seeks allowance and payment of $113,263.08 representing eighty percent of the hourly and flat-rate legal fees ($141,578.85) generated during the Interim Period for actual and necessary legal services rendered, based upon actual services rendered. The coversheet hereof contains a summary of the actual and necessary fees generated by the Firm during the Interim Period (the "Fee Application Cover Sheet"). Such fees and expenses are detailed according to matter in Exhibits A and B, attached hereto. These exhibits contain daily time logs describing the time spent by each attorney and other Firm employees during the Interim Period and the fees associated with such time for each separate matter. In the instances where flat rates are charged, there is a description of those services covered and the fee associated therewith.

13. Presently, the hourly rates under the Firm's general rate structure range from approximately $215 to $675 per hour for attorneys and $95 to $225 per hour for legal assistants

and support staff. The hourly rates set forth above are subject to periodic increases in the normal course of the Firm's business. Rate increases at the Firm occur, if at all, on January 1, and thus rates have not increased since commencement of the Firm's representation of the Debtors. The Firm has yet to decide whether there will be such on increase on January 1, 2003. These figures are slightly different than those disclosed in the "Affidavit and Statement of Michèle B. Corash Pursuant to Section 327(e) of the Bankruptcy Code and Bankruptcy Rules 2014 and 2016 in Support of the Application for Order Authorizing the Employment and Retention of Morrison & Foerster LLP as Special Intellectual Property, Regulatory and Environmental Counsel for the Debtors and Debtors in Possession" (the "Affidavit"). A supplemental affidavit correcting these figures has been filed with this Court on or about October 30, 2002. A more detailed description of the matters worked on by Firm personnel, and the time spent therefor, is included below.

B. Actual and Necessary Expenses Incurred by the Firm.

14. In addition, the Firm seeks allowance and payment of $44,073.86, representing reimbursement for actual and necessary expenses incurred by the Firm during the Interim Period. These expenses are listed in the Fee Application Cover Sheet, and further detailed according to each matter in Exhibits A and B, attached hereto.

15. As part of its request for payment of expenses during the Interim Period, the Firm customarily charges 21 cents per page for internal photocopying expenses. The Firm's photocopying machines automatically record the number of copies made when the person that is doing the copying enters the client's account number into a device attached to the photocopier. The Firm summarizes each client's photocopying charges on a daily basis. Such photocopying charges were approved in the Retention Order.

16. In addition, the Firm customarily charges $1.00 per page for local out-going facsimile transmissions, $2.00 per page for long distance out-going facsimile transmissions, and $3.00 per

page for international out-going facsimile transmissions. There is no additional charge for long distance telephone calls with respect to faxes. The charge for outgoing facsimile transmissions reflects the Firm's calculation of the actual costs incurred by the Firm for the machines, supplies and extra labor expenses associated with sending telecopies and is reasonable in relation to the amount charged by outside vendors who provide similar services. The Firm does not charge the Debtors for received faxes. Although these charge exceed the guideline set forth in the Local Rules, such fax charges were approved in the Retention Order.

17. Furthermore, regarding providers of on-line legal research (*e.g.*, LEXIS and WESTLAW), the Firm charges the standard usage rates these providers charge for computerized legal research. The Firm bills its clients the actual cash charged by such services, with no premium. Any volume discount received by the Firm is passed on to the client. Such on-line legal research charges were approved in the Retention Order.

18. The Firm believes the foregoing rates are the market rates that the majority of law firms charge clients for such services. In addition, the Firm believes that such charges are in accordance with the American Bar Association's ("ABA") guidelines, as set forth in the ABA's Statement of Principles, dated January 12, 1995, regarding billing for disbursements and other charges.

19. Because the nature of the legal services provided to the Debtors necessarily requires the employment of foreign associates, and the invoices from such foreign associates are not received by the Firm until the month after such services are rendered – at the earliest, frequently matters in which there was no attorney time charged will have expenses incurred as a result of such expenses being dated as of the invoice date. Where this is the case, it is so indicated below.

III. SUMMARY OF SERVICES RENDERED BY MATTER

20. In rendering services to the Debtors as special counsel, the Firm's legal team has been composed of professionals with extensive experience in environmental, intellectual property and bankruptcy law. These professionals have worked closely with the Debtors and their other professionals to maximize efficiency and avoid any duplication of effort. A chart showing the attorneys and other Firm employees who rendered services to the Debtors during the Interim Period, along with their (i) position at the Firm, (ii) hourly billing rate, (iii) total hours billed, and (iv) total value of services rendered, is included as part of the Fee Application Cover Sheet.

21. The legal services rendered by the Firm to the Debtors during the Interim Period have been segregated by matter into several numbered matters. The numbered matters correspond to Exhibits A and B annexed hereto, which provide (i) the dates the services were rendered; (ii) detailed descriptions of the activity; (iii) the time billed therefor; (iv) the dollar value of the particular activity; and (v) the attorneys and other employees of the Firm who rendered the identified service.

A. Environmental Matters

22. The following matters generally relate to trying to ensure the Debtors were in compliance with all applicable federal, state, and municipal environmental regulations, and where the Debtors were not, taking such steps as necessary to bring the Debtors into compliance therewith. Each matter falling within the heading of Environmental Matters is discussed below.

(1) One Arkansas (Fees: $1,167.50; Hours: $3.50)

23. This matter relates to a pre-petition lawsuit[1] by the owner of property in San Francisco, California ("Flaherty") who claims that the property was contaminated by historical activities. Flaherty sued the Debtors under CERCLA and various state and common laws alleging that the Debtors' predecessor, General Battery, contaminated the site during the 1960s

[1] *Flaherty v. Exide*, Case No. C-01-0739 CRB (N.D. Cal.)

by operating a battery manufacturing facility on the site. Prior to the bankruptcy, the Debtors had filed counterclaims against Flaherty and third-party claims against others. The Debtors have solid factual and legal arguments against liability and in support of its affirmative claims.

24. At the time of the bankruptcy, the parties had engaged in settlement-related discovery, which was overseen by a special master appointed by the court. The parties held one mediation session and were intending to proceed with an additional session when the Debtors filed for bankruptcy protection with this Court.

25. Following the Debtors' filing for bankruptcy protection, the Debtors dismissed without prejudice their third-party claims. In addition, Flaherty and the Debtors filed a joint stipulation and proposed order to stay Debtors' counterclaims, which the court entered, and have continued to work with the special master to discuss settlement prospects. During the Interim Period, the Firm engaged in settlement discussions on behalf of the Debtors as well as continued to implement the Debtors' defense strategy.

(2) General Environmental (Fees: $9,539.25; Hours: 43.00)

26. Legal assistance in this matter relates to the Firm's representation of and provision of advisory services to the Debtors regarding various environmental regulatory matters requiring immediate attention, including compliance issues. Such work includes advice relating to Operating Industries, Inc., which is a Super-Fund clean up site, Early Cash-Out Settlement, and relations between the Debtors and the California Department of Toxic Substances Control ("DTSC"). In addition, services rendered in this matter relate to several urgent environmental matters related to regulatory compliance issues at the Debtors' facility in Los Angeles, California, most of which involved situations where state regulators were involved. The Firm responded to inquires from such regulators. During the Interim Period, the Firm spent numerous

hours assisting the Debtors in reviewing settlement offers and preparing status reports for the Debtors

27. In addition, work relating to the Firm's representation of the Debtors falls in this matter, including, but not limited to, performing conflicts checks and gaining this Court's approval of the Firm's employment as a professional for the Debtor, including filing the certificate of no objection to the motion by the Firm to be employed as special counsel and all fee applications. None of the fees incurred while preparing this Application are included herewith. Such fees will be included in the Monthly Applications covering November 1 – 30, 2002.

(3) Puente Valley Operable Unit (Fees: $3,725.00; Hours: 9.25)

28. Debtors and their predecessor, General Battery, are each named by the United States Environmental Protection Agency ("EPA") as one of many potentially responsible parties for the environmental response and clean-up actions related to groundwater contamination in the Los Angeles area. Attorney time was spent in the negotiation of a *de mimimis* settlement with the EPA and the coordination of those negotiations with other *de minimis* contributors to the site. Additional time was required to respond to a demand by the EPA and the DTSC for additional groundwater sampling to detect new potential chemicals of concern in the groundwater including seeking an extension of the time allotted to perform such samples and the payment of an environmental consultant required to perform such samples.

(4) Alco Pacific (Fees: $19,177.30; Hours: 58.30)

29. The time spent in this matter relates to ongoing pre-petition litigation[2], which is active and all parties are currently engaged in pre-trial discovery. Work performed during the Interim Period included analysis of a potential motion to stay the federal court action in light of the

bankruptcy proceeding; multiple conferences with co-defendants to coordinate discovery and filing of responsive pleadings; meeting and conferences with counsel for the DTSC regarding affirmative defenses; preparation and filing of an amended answer; analysis of potential cross claims; and preparation and filing of a joint status report.

30. Substantial time in the Interim Period had been devoted to responding to written discovery requests propounded by DTSC and reviewing client documents. Further, the DTSC filed a motion to strike during this time period. Work was performed by the Firm stategizing and implementing opposition to the motion to strike. In addition, during the Interim Period the Firm assisted the Debtors in compliance with discovery requests submitted by the other parties to the suit.

31. The district court in this case has set a briefing schedule for summary judgment motions relating to Debtors' recycling exemption claims. Such hearing is set for February 2003.

(5) Vernon Facility South Coast Issues (Fees: $4,316.05; Hours: 13.30)

32. Debtors received notices of noncompliance with local air regulations from the South Coast Air Quality Management District ("SCAQMD") pertaining to emissions of nitrogen oxides and lead. To correct the noncompliance status of the facility, Debtors and the Firm formed a strategy that included the application for a variance from the nitrogen oxide emission regulations to allow the facility to operate while corrective actions are implemented. The variance application is scheduled to be heard by the SCAQMD board on October 31, 2002. Work performed during the Interim Period related to arranging and negotiating issues to be heard at the variance hearing.

B. Patent/Trademark Matters

---

[2] *State of California Department of Toxic Substances Control v. Alco Pacific, Inc., et al.*, Case No. 01-09294-MMM (N.D. Cal.)

33. These matters relate to the Firm's representation of the Debtors in intellectual property matters. In this Application and in the Firm's accounting for its work performed for the Debtors, work that was performed for the Debtors' patents or applications therefor generally is assigned to the matter "General Correspondence." Any work specifically performed relating to a single patent or application therefor is assigned to a specific matter. Work on behalf of the Debtor related to trademarks or applications therefor generally is assigned to the matter entitled "US-GTM (General Trademark)." Any work specifically performed relating to a single trademark or application therefor is assigned to a specific matter. Below is an analysis of the work performed in each intellectual property matter.

34. Generally speaking, the Firm's representation to the Debtors in the area of intellectual property involved: (i) seeking and securing post-petition financing from Citibank secured by certain intellectual property; (ii) the sale of one of the Debtors' subsidiaries, Exide Australia Pty Ltd., which owns various trademarks and required the assignment of such trademarks to the Exide before such sale could be consummated; (iii) the renewals of trademark and patent registrations; (iv) the policing of trademarks; (v) the prosecution of U.S. and international patent and trademark applications; (vi) the negotiation of co-existence agreements; and (vii) the review of marketing materials. Each of these sub-matters will be discussed in greater detail below under the matters entitled "General Correspondence" or "US-GTM (General Trademark)" for patents and trademarks respectively.

35. The Firm's policy relating to the billing of discrete intellectual property matters is to bill the client only when the work is finished. As such, certain of the matters below include time from before the Interim Period that were not included in any previous fee application. This is the practice of leading intellectual property firms nationwide.

(1) Exide Industries Ltd. (India) (Fees: $147.50; Hours: 0.50)

36. Pre-petition, the Debtors were involved in trademark prosecution matters in India. The Firm represented and continues to represent the Debtors in connection with three related trademark cases that were filed in the Delhi High Court against Exide Technologies and Tudor India in India: *Exide Industries Limited v. Exide Corporation, et. al.*, (Civil Suit No. 812 of 1997); *Exide Industries Limited v. Exide Corporation, et. al.*, (Civil Suit No. 725 of 1998); and *Exide Industries Limited v. Tudor India Limited*, (Civil Suit No. 1162 of 1997). In each case, the Debtors are seeking to stop others from using their various trademarks or are seeking to assure their ability to continue to use the trademarks. The time spent in this matter relates to coordination with Indian counsel for the expeditious and successful prosecution of these cases.

(2) DE-Process for Remediation of Lead-Contaminated Soil and Waste Battery Casings (Fees: $100.00; Hours: Flat Rate)

37. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' German patent application for their invention "Process for Remediation of Lead-Contaminated Soil and Waste Battery Casings" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(3) FR-Process for Remediation of Lead-Contaminated Soil and Waste Battery Casings (Fees: $404.00; Hours: Flat Rate/1.00)

38. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' French patent application for their invention "Process for Remediation of Lead-Contaminated Soil and Waste Battery Casings" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

39. The Firm performed additional work, which was billed on an hourly basis, regarding the oversight of the foreign associate charged with the prosecution of this application

(4) EP-Nozzle Assembly for Injection Molding Apparatus (Fees: $380.00; Hours: 1.25)

40. During the Interim Period, the Debtors European Community patent application for their invention "Nozzle Assembly for Injection Molding Apparatus" was rejected. The Firm worked with a foreign associate to attempt to have the application fee partially refunded.

(5) EP-Alloys for Positive Ebatteries (Fees: $250.00; Hours: Flat Rate)

41. Within two weeks of the due date for certain fees due in connection with the Debtors' application for a European Community patent for their invention "Alloys for Positive Ebatteries," the Debtors instructed the firm to monitor and provide for payment of those fees. The Firm charges a flat rate for this service.

(6) JP-Plastic Battery Container having Reduced End Wall Deflection (Fees: $0.00; Hours: 0.00)

42. Although no attorney time was spent on this matter during this Interim Period, expenses were incurred for Governmental Filing Fees. Such expenses are detailed in Exhibit B-6.

(7) CA-Plastic Battery Container Having Reduced End Wall Deflection (Fees: $100.00; Hours: Flat Rate)

43. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Canadian patent application for their invention "Plastic Battery Container Having Reduced End Wall Deflection" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(8) EP-Improved Lead Acid Storage Battery and Method of Bonding Battery Cell Terminal Posts and Bushings (Fees: $608.00; Hours: 2.00)

44. During the Interim Period, the Firm received instructions from the Debtors regarding an amendment of their application for a European Community patent for their invention "Improved Lead Acid Storage Battery and Method of Bonding Battery Cell Terminal Posts and Bushings." The Firm's assistance consisted of reviewing the amendment drafted by the foreign associate, revising it, and returning it to such associate for filing.

(9) AU-Improved Lead Acid Storage Battery and Method of Bonding Battery Cell Terminal Posts and Bushings (Fees: $100.00; Hours: Flat Rate)

45. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Australian patent application for their invention "Improved Lead Acid Storage Battery and Method of Bonding Battery Cell Terminal Post and Bushings" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(10) AU-Sealed Lead-Acid Battery Tray Assemblies and Motive Power Vehicles Using Such Battery Tray Assemblies (Fees: $100.00; Hours: Flat Rate)

46. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Australian patent application for their invention "Sealed Lead-Acid Battery Tray Assemblies and Motive Power Vehicles Using Such Battery Tray Assemblies" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(11) MX-Sealed Lead-Acid Battery Tray Assemblies and Motive Power Vehicles Using Such Battery Tray Assemblies (Fees: $100.00; Hours: Flat Rate)

47. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Mexican patent application for their invention "Sealed Lead-Acid Battery Tray Assemblies and Motive Power Vehicles Using Such Battery

Tray Assemblies" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(12) CA-Sealed Lead-Acid Battery Tray Assemblies and Motive Power Vehicles Using Such Battery Tray Assemblies (Fees: $100.00; Hours: Flat Rate)

48. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Canadian patent application for their invention "Sealed Lead-Acid Battery Tray Assemblies and Motive Power Vehicles Using Such Battery Tray Assemblies" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(13) EP-Battery Grids and Plates and Lead-Acid Batteries Made Using Such Grids and Plates (Fees: $0.00; Hours: 0.00)

49. Although no attorney time was spent on this matter during this Interim Period, expenses were incurred for Governmental Filing Fees. Such expenses are detailed in Exhibit B-13.

(14) CA-Calcium-Tin-Silver Lead-Based Alloys, and Battery Grids and Lead-Acid Batteries Made Using Such Alloys (Fees: $0.00; Hours: 0.00)

50. Although no attorney time was spent on this matter during this Interim Period, expenses were incurred for Governmental Filing Fees. Such expenses are detailed in Exhibit B-14.

(15) US-Valve-Regulated Lead-Acid Cells and Batteries and Separators Used in Such Cells and Batteries (Fees: $535.50; Hours: 1.25)

51. During the Interim Period, the Debtors received an office response to their application for a United States patent for their invention "Valve-Regulated Lead-Acid Cells and Batteries

and Separators Used in Such Cells and Batteries." The Firm informed the Debtors of its receipt and prepared a strategy to respond to the office action.

(16) TW-Process for Fixing Lead-Contaminated Ecologically Hazardous Industrial Waste Materials Using Clinoptilolite Zeolite (Fees: $100.00; Hours: Flat Rate)

52. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Taiwanese patent application for their invention "Process for Fixing Lead-Contaminated Ecologically Hazardous Industrial Waste Materials Using Clinoptilolite Zeolite" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(17) KR-Process for Fixing Lead-Contaminated Ecologically Hazardous Industrial Waste Materials Using Clinoptilolite Zeolite (Fees: $100.00; Hours: Flat Rate)

53. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Korean patent application for their invention "Process for Fixing Lead-Contaminated Ecologically Hazardous Industrial Waste Materials Using Clinoptilolite Zeolite" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(18) US-Sealed Lead-Acid Cells and Batteries Having Internal and External Restraint for Accommodating Plate Growth (Fees: $100.00; Hours: Flat Rate)

54. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' United States patent application for their invention "Sealed Lead-Acid Cells and Batteries Having Internal and External Restraint for Accommodating Plate Growth" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(19) EP-Sealed Lead-Acid Cells and Batteries (Fees: $100.00; Hours: Flat Rate)

55. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' European Community patent application for their invention "Sealed Lead-Acid Cells and Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(20) DE-Sealed Lead-Acid Cells and Batteries (Fees: $325.00; Hours: Flat Rate)

56. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' German patent application for their invention "Sealed Lead-Acid Cells and Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

57. Upon receiving a European Community patent registration for this invention, the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the German patent office. Such legal assistance is billed as a flat rate.

(21) ES-Sealed Lead-Acid Cells and Batteries (Fees: $325.00; Hours: Flat Rate)

58. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Spanish patent application for their invention "Sealed Lead-Acid Cells and Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

59. Upon receiving a European Community patent registration for this invention, the various patent offices within the European Community requested validation of the European

Community registration. The Firm provided the validation to the Spanish patent office. Such legal assistance is billed as a flat rate.

(22) FR-Sealed Lead-Acid Cells and Batteries (Fees: $325.00; Hours: Flat Rate)

60. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' French patent application for their invention "Sealed Lead-Acid Cells and Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

61. Upon receiving a European Community patent registration for this invention, the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the French patent office. Such legal assistance is billed as a flat rate.

(23) IT-Sealed Lead-Acid Cells and Batteries (Fees: $325.00; Hours: Flat Rate)

62. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Italian patent application for their invention "Sealed Lead-Acid Cells and Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

63. Upon receiving a European Community patent registration for this invention, the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the Italian patent office. Such legal assistance is billed as a flat rate.

(24) SE-Sealed Lead-Acid Cells and Batteries (Fees: $325.00; Hours: Flat Rate)

64. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Swedish patent application for their invention "Sealed Lead-Acid Cells and Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

65. Upon receiving a European Community patent registration for this invention, the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the Swedish patent office. Such legal assistance is billed as a flat rate.

(25) GB-Sealed Lead-Acid Cells and Batteries (Fees: $225.00; Hours: Flat Rate)

66. Upon receiving a European Community patent registration for the Debtors' invention "Seal Lead-Acid Cells and Batteries," the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the British patent office. Such legal assistance is billed as a flat rate.

(26) AU-Maintenance-Free Battery and Battery Grids and Alloys Used in Making Such Batteries (Fees: $100.00; Hours: Flat Rate)

67. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Australian patent application for their invention "Maintenance-Free Battery and Battery Grids and Alloys Used in Making Such Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(27) US-Lead Oxide Composition for Use in Lead-Acid Batteries (Fees: $100.00; Hours: Flat Rate)

68. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' United States patent application for their

invention "Lead Oxide Composition for Use in Lead-Acid Batteries" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(28) AU-Sealed Lead-Acid Battery Tray Assembly and Motive Power Vehicles Using Such Battery Tray Assemblies (Fees: $100.00; Hours: Flat Rate)

69. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Australian patent application for their invention "Sealed Lead-Acid Battery Tray Assembly and Motive Power Vehicles Using Such Battery Tray Assemblies" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(29) DE-Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals (Fees: $100.00; Hours: Flat Rate)

70. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' German patent application for their invention "Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(30) FR-Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals (Fees: $225.00; Hours: Flat Rate)

71. Upon receiving a European Community patent registration for the Debtors' invention "Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals," the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the German patent office. Such legal assistance is billed as a flat rate.

(31) GB-Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals (Fees: $325. 00; Hours: Flat Rate)

72. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' British patent application for their invention "Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

73. Upon receiving a European Community patent registration for this invention, the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the British patent office. Such legal assistance is billed as a flat rate.

(32) IT-Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals (Fees: $325.00; Hours: Flat Rate)

74. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Italian patent application for their invention "Induction Heating Apparatus and Method for Intercell Connectors to Battery Cell Terminals" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

75. Upon receiving a European Community patent registration for this invention, the various patent offices within the European Community requested validation of the European Community registration. The Firm provided the validation to the Italian patent office. Such legal assistance is billed as a flat rate.

(33) MX-Improved Positive Lead-Acid Battery Grids and Cells and Batteries Using Such Grids (Fees: $0.00; Hours: 0.00)

76. Although no attorney time was spent on this matter during this Interim Period, expenses were incurred for Governmental Filing Fees. Such expenses are detailed in Exhibit B-33.

(34) FR-Modular Battery Cabinet Assembly (Fees: $100.00; Hours: Flat Rate)

77. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' French patent application for their invention "Modular Battery Cabinet Assembly" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(35) IT-Modular Battery Cabinet Assembly (Fees: $100.00; Hours: Flat Rate)

78. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Italian patent application for their invention "Modular Battery Cabinet Assembly" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(36) US-Lead-Acid Cell and Positive Plate and Alloy Therefor (Fees: $784.00; Hours: Flat Rate/2.25)

79. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' United States patent application for their invention "Lead-Acid Cell and Positive Plate and Alloy Therefor" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

80. Furthermore, the Firm reported to the Debtors on the progress of this application and formulated a strategy to create efficiencies in this application and others that are similar.

(37) CA-Battery Container Compartment and End Wall Stiffening Block (Fees: $456.00; Hours: 1.50)

81. During the Interim Period, the Firm received correspondence from the Canadian Registrar of Patents regarding the Firm's ability to apply for a Canadian Patent on behalf of the

Debtors with regard to the Debtors' invention "Battery Container Compartment and End Wall Stiffening Block." Before responding, the Firm corresponded with the foreign associate charged with the prosecution of this application regarding the requirement under Canadian Law. After reviewing the requirements, the Firm provided instructions to the foreign associate to proceed.

(38) US-Low Profile Six-Volt Lead-Acid Battery With Front Terminals

(Fees: $1,596.00; Hours: 5.25)

82. During the Interim Period, the Debtors' received a on office response with regard to their application for a United States patent for their invention "Low Profile Six-Volt Lead-Acid Battery With Front Terminals." The Firm devised and implemented a strategy to shepherd the application past this impediment.

(39) EP-Low Profile Six-Volt Lead-Acid Battery With Front Terminals

(Fees: $225.00; Hours: Flat Rate)

83. Upon receiving a European Community patent registration for the Debtors' invention "Low Profile Six-Volt Lead-Acid Battery With Front Terminals," the various patent offices within the European Community generally request validation of the European Community registration. The Firm worked with the European Community patent office to lay the ground-work for providing validations in the future. Such work is billed as a flat rate.

(40) CA-Low Profile Six-Volt Lead-Acid Battery With Front Terminals

(Fees: $0.00; Hours: 0.00)

84. Although no attorney time was spent on this matter during this Interim Period, expenses were incurred for Governmental Filing Fees. Such expenses are detailed in Exhibit B-40.

(41) JP-Low Profile Six-Volt Lead-Acid Battery With Front Terminals

(Fees: $100.00; Hours: Flat Rate)

85. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Japanese patent application for their invention "Low Profile Six-Volt Lead-Acid Battery With Front Terminals" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

(42) KR-Low Profile Six-Volt Lead-Acid Battery With Front Terminals (Fees: $1,088.00; Hours: Flat Rate/ 3.25)

86. During the Interim Period, the Firm received instructions from the Debtors regarding the transfer of the responsibility of the Debtors' Japanese patent application for their invention "Low Profile Six-Volt Lead-Acid Battery With Front Terminals" to the Firm from previous counsel. The work necessary for such a transfer is billed as a flat rate.

87. Furthermore, the Debtors sought to assign this application from GNB, a related entity, to the Debtors. The Firm corresponded with a foreign associate regarding the procedures necessary to accomplish this transfer. Such work was billed on an hourly basis.

(43) HK-Low Profile Six-Volt Lead-Acid Battery With Front Terminals (Fees: $0.00; Hours: 0.00)

88. Although no attorney time was spent on this matter during this Interim Period, expenses were incurred for Governmental Filing Fees. Such expenses are detailed in Exhibit B-43.

(44) WO-Seismic Rated Battery Racking System (Fees: $299.00; Hours: Flat Rate/ 0.50)

89. In order obtain a patent registration through the Patent Cooperation Treaty, the Debtors required the appoint of an agent within the U.S. Receiving Office. The Firm assisted the Debtors by making contact with such an agent and forwarding the file regarding the Debtors'

application for such a patent for their invention "Seismic Rated Battery Racking System." Such work is billed on as a flat rate.

90. Furthermore, the Firm, on an hourly basis, kept the Debtors informed as to the progress of this application.

(45) US-Detachable Rope Handle Assembly (Fees: 107.00; Hours: 0.25)

91. During the Interim Period, the Debtors received a United States patent for their invention "Detachable Rope Handle Assembly." Pursuant to this registration, the Firm received a notice regarding the issuance fee. During the Interim Period, the Firm advised the Debtors of this receipt.

(46) US-Lead-Acid Separators and Cells and Batteries (Fees: $1,064.00; Hours: 3.50)

92. During the Interim Period, the Debtors received a United States patent for their invention "Lead-Acid Separators and Cells and Batteries." The Firm ensured the patent registration contained no errors. Furthermore, the Firm assisted the Debtors with the investigation of an unfiled formal declaration.

(47) US-Flat Stack VRLA (Fees: $4,242.00; Hours: 13.75)

93. During the Interim Period, the Debtors instructed the Firm to begin the application process for their invention "Flat Stack VRLA." Work performed by the Firm during the Interim Period on this matter relates to the work necessary to draft and submit the application and the required disclosures.

(48) General Correspondence (Fees: $21,762.00; Hours: 69.00)

94. As discussed above, this matter relates to advice and work performed on behalf of the Debtors that relates generally to patents and applications therefor. Following are detailed

descriptions of the several matters of patent work performed for the Debtors during the Interim Period.

a. Prosecution of U.S. Patent Applications and Preparation of New U.S. Patent Applications. Time spent preparing responses to official actions of the United States Patent office in pending patent applications and preparing new patent applications. This includes conferring with the Debtors' personnel directly responsible for research and development of new technologies, to provide accurate information to the Patent Office to obtain allowance of pending applications; legal research into issues raised in claim rejections in arguments submitted in favor of patentability of pending applications; reviewing prior art references, such as patents and technical documents, cited by the patent examiner in connection during the prosecution of applications; and drafting detailed responses and amendments. Further, this time includes managing administrative aspects of the Debtors' portfolio of pending patent, advising on prosecution strategies, and developing patent family development to protect competitive technologies and market share, as well as monitoring the status of the Debtors IP assets by reviewing assignment records and recording new assignments for assets obtained via mergers and acquisitions.

b. Prosecution of International Patent Applications. Time spent reviewing communications from patent offices in countries throughout the world, conferring with legal associates in each country who provide advice on customs and practices within their country to aid the Debtors in furthering prosecution of these applications, and preparing instructions for prosecution for each associate to follow in the prosecution of pending patent applications. The Firm also manages

the Debtors' international issued-patent portfolio to ensure that all annuity and maintenance fees are paid and all foreign associates receive timely instructions and technical information to assist in the preparation and filing of documents required under local law to maintain and develop the Debtors' patents.

c. Preparing patent-related legal advice. The Firm has provided legal advice for the Debtors on issues relating to, for example, patentability, patent validity, and patent infringement to minimize potential risks that may be associated with product development, product acquisition, and to assess the propriety of intellectual property enforcement.

(49) US-GTM (General Trademark) (Fees: $45,828.75; Hours: 192.00)

95. Like "General Correspondence," work in this matter relates to general advice and work performed on behalf of the Debtors that relates to trademarks owned by the Debtors generally. This matter includes work performed for the Debtors involving the strategy to be employed to protect the Debtors' rights in their trademarks world-wide, including due diligence, research, and the reviewing of correspondence in order to develop a comprehensive trademark strategy. Following is a description of the work that was performed under this matter.

a. Debtor In Possession Financing. The Debtors' reorganization efforts required post-petition financing. Citibank's offer of such financing required the credit to be collateralized by security interests in certain intellectual property owned by some of the Debtors' European subsidiaries. Because consolidation of the trademark files had not been completed prior to the bankruptcy filing, the Firm investigated ownership issues and performing due diligence to ensure the intellectual property would have clear title. The Firm then prepared various trademark schedules for the approximately fifteen subsidiaries that had

intellectual property and formed the foreign collateral package. These schedules were utilized to grant Citibank's security interest.

b. Exide Australia Pty Ltd. Sale Issues. The Debtors are planning to sell its Australian subsidiary, Exide Australia Pty Ltd ("Exide Australia"), in an upcoming trade sale. As Exide Australia owns various trademarks, the Debtors' strategy required the assignment of some of those trademarks from Exide Australia to the other Debtors prior to the trade sale. In addition, Exide Australia sought to be able to license some trademarks from the Debtors. The Firm spent time preparing trademark schedules reflecting those trademarks that would be assigned to the Debtors, those trademarks that would remain with Exide Australia, and those trademarks that Exide Australia would license from the Debtors. Also, the Firm counseled the Debtors regarding the various implications of assigning certain trademarks and/or licensing those trademarks to Exide Australia. Moreover, when Exide Australia was assigned its trademarks from the Pacific Dunlop entities, the Debtors did not complete the recordation of the assignments with the relevant foreign trademark offices or other steps necessary to perfect the assignments. Consequently, prior to the sale of Exide Australia, it was necessary to record the assignment of the trademarks from the Pacific Dunlop entities to Exide Australia. The Firm had recorded the assignments, including drafting instructions to foreign associates and collecting appropriate documentation.

c. Renewals. Throughout the Interim Period, the Debtors had various trademark registrations requiring renewal. If a registration is not renewed, it is cancelled. The Firm spent time sending out reminders to appropriate employees of the Debtors regarding upcoming renewals, ascertaining whether the relevant

mark was still in use, and confirming that the registration should be renewed. If the mark was still in use, then the Firm spent time drafting a supporting declaration, obtaining specimens, and drafting instructions to foreign associates. Recordation of prior assignments for many of the Debtors' trademarks was never completed, consequently, prior to renewing certain registrations, it was necessary for the Firm to collect appropriate documentation and draft instructions to the relevant foreign associates to record the assignment, merger, and/or name change.

d. Policing – Oppositions. In order to maintain trademark rights, an entity must police those rights; otherwise, the entity loses its ability to stop others from using its mark. In order to monitor third party use, the Debtors subscribe to a watch service for certain important marks. Consequently, the Firm spent time reviewing these watch notices to determine whether there were any third-party infringers or potential infringers. On occasion, the Debtors brought problematic third-party uses to the Firm's attention. In addition, sometimes third parties institute challenges to the Debtors' trademark applications and/or use of a trademark. In such instances, the Firm spent time analyzing whether or not there was a likelihood of confusion and strategizing with relevant personnel within the Debtors and foreign associates. The Firm spent time drafting instructions to foreign associates and assembling information and evidence to both defend and institute opposition proceedings in foreign countries.

e. Prosecution of Trademarks. The Debtors continue to introduce new products. The Firm advised the Debtors regarding mark selection. Specifically, the Firm conducted screening searches and reviewed and analyzed full searches in order to offer guidance as to possible issues with prior third-party users of similar

marks. In addition, working with employees of the Debtors, the Firm drafted and filed new trademark applications. Also, the Debtors have multiple pending trademark applications throughout the world. The Firm reviewed, analyzed, and drafted responses to multiple office actions issued in regard to these pending applications.

f. Co-Existence Agreements. One of the various manners in which the holder of a intellectual property derives profit therefrom is through co-existence agreement or licenses. The Firm's legal assistance included the negotiation of co-existence and/or licensing agreements with third parties and the researching and drafting of appropriate language for such co-existence and/or licensing agreements. Some of these agreements are in foreign countries and therefore required the Firm to correspond and seek further guidance on behalf of the Debtors from foreign associates.

g. Review of Marketing Material. In order to maintain their trademark rights, it is important for the Debtors to mark the products appropriately and refer to the products correctly in labeling, marketing, and advertising materials. The Firm spent time reviewing labels and marketing and advertising materials for correct trademark usage.

IV. CONCLUSION

162. As set forth above and more specifically in the Application Cover Sheet, attorneys and other Firm employees have expended a total of 435.85 hours in connection with these matters during the Interim Period. The nature of the work performed by these persons for each individual matter worked on is fully set forth in Section III above and Exhibits A and B, attached hereto. The reasonable value of the legal services rendered and fees incurred by the Firm to the Debtors during the Interim Period was $141,578.85.

163. With reference to the factors to be considered in connection with fee applications, bankruptcy courts often look to the leading case of *Johnson v. Georgia Highway Express, Inc.*,

488 F.2d 714 (5th Cir. 1974). *See also Lindy Bros. Builders v. American Radiator & Standard Sanitary Corp.*, 487 F.2d 161 (3d Cir. 1973). The Firm respectfully submits that this Application is reasonable when measured in light of the factors cited in these cases, is in full compliance with the requirements of Local Rule 2016-2, and that all of the services performed by the Firm have substantially benefited the Debtors, their estates and their creditors.

164. The Firm further submits that, under all of the applicable criteria, and based upon the factors to be considered under section 330 of the Bankruptcy Code, the compensation requested is fair and reasonable given (i) the complexity of these litigation and related matters; (ii) the nature and extent of the services rendered; (iii) the time expended on these matters; (iv) the value of the services provided; and (v) the costs of comparable services other than in a case under the Bankruptcy Code.

165. This Application is the Firm's fourth monthly fee application, covering the entire Interim Period.

166. WHEREFORE, the Firm respectfully requests that this Court enter an order (i) granting to the Firm the payment of eight percent of $141,578.85, or $113,263.08, as compensation for necessary professional services rendered to the Debtors during the Interim Period; (ii) granting to the Firm an allowance in the amount of $44,073.86 as reimbursement of actual and necessary costs and expenses incurred during the Interim Period; (iii) directing that the foregoing amounts be paid to the Firm; and (iv) granting such other and further relief as the Court deems just and proper.
