Install 220 plug in 3rd room for laser

Troubleshooting/Work Description:

Arrived on site and met with customer. She had new equipment she needed twist lock plugs installed for. After discussing it with her she decided to install a receptacle in all 3 rooms. I gathered a material list and went and picked up material.

<u>I came back and brought all tools and material inside. I set up ladder and popped ceiling tiles. We then measured out MC and made cuts. We pulled all 3 feeds into there designated rooms and left slack near the panel. We then cut holes in drywalland fished wire down the wall.</u>

Once wire was ran we installed boxes and added receptacles. We put stainless steel covers on them. We then went to the panel and landed all 3 circuits on 2 pole 30amp breakers. We labeled panel schedule and checked voltage. We had 207v phase to phase and 120v each phase to ground at all receptacles.

Once done we vacuumed all work areas and cleaned up all trash. Site complete.

Customer explained they were a corporation and she did not have a means to pay. You will need to contact Jim Allie for payment. Problem(s) Found: See troubleshooting vair(s) Made: Je troubleshooting
