Dear Sirs

I have received your November 10th notice of the "preliminary and final sale hearing" regarding case #03-02984 WEE, (Mississippi Chemical Corporation)

Please be advised that the sale or auction of the assets of Mississippi Chemical Corporation - as given in the notice, (paragraph 1 under "Auction and Bid Procedures"), fails to mention the considerable production, distribution and sale of potash fertilizer products - but refers only to the production, distribution and sale of nitrogen fertilizer products

Unless the phosphates and potash interests are part of the "Off-Take", collectively referred to as "Fertilizer Assets", they should be specifically mentioned

I have been a royalty recipient from the sale proceeds of Eddy Potash, Inc since it became a part of Mississippi Chemical Corporation

Sincerely,

Charles W Harris
