ESTIMATED HYPOTHETICAL LIQUIDATION ANALYSIS
PURSUANT TO CHAPTER 7

Liquidation Analysis

Introduction

The Liquidation Analysis (the "Analysis") is based upon the Techneglas projected balance sheets (unaudited) as of August 31, 2005.

The Analysis presents managements' current estimated net value of assets, if liquidated under the provisions of Chapter 7 of the Bankruptcy Code and distribution of net proceeds of the liquidation to creditors. Each of the Debtors reserves the right to periodically update or modify the estimates set forth herein.

This Analysis has not been examined or reviewed by independent accountants in accordance with the standards promulgated by the American Institute of Certified Public Accountants. The estimates and assumptions contained herein, although considered reasonable by each of the Debtors, are inherently subject to significant uncertainties and contingencies beyond the control of the Debtors. Accordingly, there can be no assurance that the results shown would be realized if one or more of the Debtors were actually liquidated under the provisions of Chapter 7 of the Bankruptcy Code. Actual results in such a case could vary materially from those presented in the Analysis.

The notes to the Analysis are an integral part of the Analysis. All information is in US Dollars, unless otherwise stated.

I. Techneglas, Inc.

Assets Available to Equity		0		0	

PLEASE NOTE THAT TECHNEGLAS HAS NOT PROCESSED OR ADJUDICATED ALL OF THE CLAIMS ASSERTED AGAINST IT, THEREFORE THE AMOUNTS SET FORTH ABOVE ARE ESTIMATES ONLY.

1. "Accounts Receivable" is comprised primarily of amounts owed by MT Picture Display Corporation of America (Ohio). The net Accounts Receivable balance projected for August 31, 2005 is \$12.1 million. "High Value" represents Accounts Receivable net of the approximate historical dilution of sales and potential for disputes given change in management severing of future relationships with customer. "Low Value" represents the risk associated with having the majority of the Accounts Receivable with one customer.
2. "Inventory" is comprised almost exclusively of finished goods located at a consigned warehouse near the MT Picture Display Corporation of America (Ohio) plant. There are de minimis quantities of inventory located at the Perrysburg, Ohio facility for the dopants and glass resins businesses. Inventory recovery ranges from twenty to fifty percent. The "High Recognizable Recovery" reflects the potential that the Inventory could be sold if MT Picture Display Corporation of America (Ohio) continues to buy materials from Techneglas albeit at discounted prices from those it could by from NEG directly. The "Low Recognizable Recovery" reflects the potential, in a Chapter 7 liquidation scenario, that MT Picture

Display Corporation of America (Ohio) will begin buying all its glass components from NEG directly, leaving Techneglas with highly specialized inventory and extremely limited buyers, if any.

3. "Precious Metals" represents those precious metals located at the Perrysburg, Ohio facility. These precious metals are highly liquid with a stated market price at which they can be disposed.
4. Recovery values are based upon the results of the Techneglas marketing efforts, sales process, and the estimates of CB Richard Ellis, the real estate brokers retained by Techneglas in its Chapter 11 Case.

(\$ in millions)

	Projected Real Estate Value	High Environmental/Other Clean-Up Costs (Including Removal Costs)	Low Fair Market Value	Low Environmental/Other Clean-Up Costs (Including Removal Costs)	High Fair Market Value
Columbus, Ohio Property	\$3.0	\$3.0	\$0.0	\$1.3	\$1.7
Pittston, Pennsylvania Propety	7.0	5.0	2.0	0.2	6.8
Perrysburg, Ohio Property	2.0	1.0	1.0	0.0	2.0
Total Property, Plant & Equipment	\$12.0		\$3.0	\$1.5	\$10.5

5. As calculated in an analysis performed by professionals retained by Techneglas based upon information provided to such professionals by Techneglas. Low recovery reflects potential defenses NEG may have to lower preference claim.
6. Costs associated with a Chapter 7 liquidation and with the duties of a Chapter 7 trustee have been assumed to be approximately four percent of the midpoint of the liquidation value of the non-cash assets of Techneglas plus a range of potential costs associated with holding the real estate properties for a three month period, and three percent of the liquidation value of the total assets of Techneglas, respectively
7. The PBGC claim recovery is allocated among the three Debtors' estates based upon the percentage of estimated unsecured claims against the Debtors' respective estates.
